

Industrial and Commercial Surface Preparation

Grit Blasting and Paint Spraying Services

For commercial, industrial, construction and home & renovation projects.

Grit Blasting UK is based in Wiltshire and offers a local and national Surface preparation service.

Our staff are fully trained, and have experience in surface preparation and blasting services.

Grit blasting has a wide range of applications - from blasting of steel, iron, stone and wood to removing graffiti.

We offer floor preparation as part of our services, and prepare concrete floors of any size - removing old paint, and other surface contaminants.

We specialise in the application of surface coatings including industrial paint spraying of primers, top coats and fire protection coatings. The right surface coating will provide excellent anti-corrosion protection as well as ensuring durability, temperature tolerance, hardness, friction resistance and defence from chemical attack.

We operate a mobile grit blasting service across the UK, and have a dedicated blasting yard for local and smaller jobs based in Devizes. We offer a local pick-up and delivery service for Wiltshire and surrounding counties.

We have developed a broad range of clients which include Private individuals, building contractors, local authorities, carpenters, plasterers, reclamation yards, machine restorers, damp proofers, interior designers, civil engineers, steel erectors and decorators. We work with large and smaller construction companies. As well as undertaking the work we offer advice and support to other professionals.

We are familiar with modern procurement procedures and work alongside contractors and sub-contractors to provide an efficient and 'value for money' service. Our investment in new technologies, training and the latest equipment ensures we are knowledgeable and competent for all surface preparation and application jobs.
