

# Industrial and Commercial Floor Preparation

**Grit Blasting UK** is based in Wiltshire and offers a local and national Floor / Surface preparation service.

Larger construction and engineering companies now rely on Grit Blasting UK as a preferred sub-contractor because of our reliability and experience. This is particularly the case in floor preparation.

Floor preparation is an efficient and environmentally acceptable dust free method of preparing concrete surfaces. Grit Blasting UK uses its expertise and the latest in diamond floor grinding technology to provide a clean, professional smooth finish ready for the application of surface treatments such as paint.

Grit Blasting is undertaking more and more floor preparation projects for contractors. The demand for 'out of town' warehouses, shopping centres, factories and other storage space is giving rise to the need for preparation of much bigger floor spaces, and required in a shorter time frame because of the tight deadlines on the overall building and construction jobs where cost control is critical.

Investing in the latest technology is key to reducing the timescales on bigger jobs such as floor preparation. We maintain a fleet of diamond floor grinders applicable for any size of project, and the latest staff training ensures an efficient and highly skilled team familiar with the latest techniques.

An understanding of the science behind the materials, the paint applications as well and the safety needs of the work and the after-care of the materials is also a key requisite of our work.

We undertake any size of floor preparation work and are experts in our field with over 20 years' experience.

**E: [enquiries@gritblastinguk.co.uk](mailto:enquiries@gritblastinguk.co.uk)**

We have developed a broad range of clients which include Private individuals, building contractors, local authorities, carpenters, plasterers, reclamation yards, machine restorers, damp proofers, interior designers, civil engineers, steel erectors and decorators. We work with large and smaller construction companies. As well as undertaking the work we offer advice and support to other professionals.

We are familiar with modern procurement procedures and work alongside contractors and sub-contractors to provide an efficient and 'value for money' service. Our investment in new technologies, training and the latest equipment ensures we are knowledgeable and competent for all surface preparation and application jobs.
